

HENRY BAKER COLLEGE, MELUKAVU

Annual E-Governance Report 2019-20

E-governance system implemented in Henry Baker College facilitates transparency in administration and governance. The college office is fully automated since the academic year 2019-20. Administration, Finance and Accounts, Students' admission and support including the attendance of students and examinations are programmed to function with the aid of TCS software developed by Meshi Logic, Calicut. The salary of teaching and non-teaching staff is processed through SPARK and GAIN PF. The Library is another area where e-governance is implemented. KOHA, an integrated library management system manages all the operations of the Library. Digital Repository Collection of our library hosts e-resources of online courses, career sites, live news, e-newspapers, e-books, e-journals, e-thesis, archive of question papers, photos and videos of events etc. E-Governance initiatives of Henry Baker College successfully reduce the manual efforts and improve the communication, create a transparent system for administration, and save time.
