For a researcher, an understanding of statistical package is essential for quantitative and qualitative research. A statistical computing package provides a convenient means to store the data and derive descriptive and inferential statistics. Besides, the statistical package can provide an unified operating framework and common interface for data manipulation visualization and statistical analysis. The Statistical Package for Social Science (SPSS) is a widely used general purpose survey analysis package. SPSS is a leading global provider for predictive analytics software solutions. Research and Postgraduate Department of Commerce of Henry Baker College is organizing two day workshop on Application of Statistical Technique in Commerce and Management. It aims at providing hands-on training on the application of statistical tools used in.

IBM SPSS statistics is used by the ten of thousands of commercial, government and academic organizations worldwide to solve a range of business and research problems. It offers rich statistical capabilities paired with features that make it easier to access and manage data, select and perform analyses and share results. Dr. Riyas Y., Assistant Professor, TKM College Kollam, was the Resource Person. The sessions was informative by giving Hands-on Training
